WOLF-Garten – LI-ION Power Finesse 50

Lightweight for shrubs, lawn and topiary

Quick blade change for every situation

Lightweight and multi-functional, with powerful performance and quick recharge – the three WOLF-Garten LI-ON Power Finesse 50 shears are semi-professional shears for shrubs, lawns and topiary. The latter is the latest trend, using a special ‘contour’ blade.

Weighing less than 600g, this light-weight range is especially developed with women in mind. They are increasingly becoming the planners and gardeners of private gardens and are not afraid of hard work. And pruning is a strenuous job.

All three Finesse 50 devices are light and ergonomically formed; with the Softgrip they sit well in the hand and can be held safely and securely. Appearance and finish are, as usual, of a high standard. The control elements are on the handle and are easily accessible. Even small hands are able to use the one-handed controls.

Naturally, the blades are top quality, as is only appropriate for a set of WOLF-Garten shears. The system for changing the blades quickly allows the problem-free changeover, without getting greasy fingers. Within a few hand movements, the lawn shears become pruning shears and vice versa.

Press Release

Long-lasting batteries offer a high cutting performance; they supply power for an average running time of 50 minutes. The charger only requires two-and-a-half hours to “fill it up”.

The practical and comfortable packaging is simultaneously the docking and the charging station. It can be easily fitted onto the wall – then the blades are stored safely. The family garage is the optimal place to offer dust protection. Other blades can be kept there as well.
