### **Mastervolt wins „iF product design award 2010“**

## **Award winning Inverters**

### **MasterSol CS 20 TL is effective and attractive**

**The Dutch company Mastervolt, manufacturer of inverters and self-sufficient generating systems has been awarded the renowned seal of quality “iF product design award 2010” by a jury of distinguished experts. The award is only presented to particularly creative, innovative and qualitatively superior products.**

The MasterSol CS 20 TL is a highly modern solar inverter which with an efficiency level of 98% achieves exemplary values. Thanks to two MPP Trackers and a wide input voltage range of 200 to 1000 Volts it is able to offer a high degree of flexibility. An IP65 electronic casing protects it optimally from water and dust, the MasterSol CS20TL is therefore perfectly suited for outdoor use.

Although, it is not only the technical values that are impressive. A jury made up of international jurors has awarded the MasterSol CS20TL the “iF production design award 2010”, a design prize that is not only renowned in Germany. The award was presented in the category “Industry/Skilled Trades“. Mastervolt is entitled to use the “iF winner logo 2010” immediately. A total of 2486 products were submitted by 1016 participants from 39 countries, 778 entries were awarded a prize.

From the 2nd of March 2010 until the 2nd of August 2010, the “iF product design award exhibition” will exhibit the winning entries. “iF” expects about 250 000 international visitors in Hanover during this period.

Also from March onwards, the winners will be exhibited on the “iF” website, which, together with its many millions of page impressions, belongs to one of the most popular internet design platforms. In addition, the MasterSol CS20TL will receive an entry in the “iF production design award yearbook 2010“, which, with a pressrun of 5000 copies, is distributed worldwide.

More information about this topic can be obtained from Mastervolt in 51105 Cologne. =MASTERVOLT/BfC=
