From CitrinSolar in Moosburg:

Solar large storage units individually manufactured

Standard storage unit available up to 10,000 litres

CitrinSolar not only builds intelligent storage technology in standard sizes. They are also tailor-made to XXL format – both for private customers as well as industrial companies.

The storage range is flexible and extensive and CitrinSolar makes these for a wide variety of different applications. But sometimes this broad product spectrum is not adequate to cover all requirements, for instance, for low-energy buildings with high solar covering or industrial projects. That's no problem for the Moosburg company.

CitrinSolar not only focuses in terms of planning technology on the manufacture of large storage units. On one of the most modern computer-controlled robotic production lines in Europe, the Moosburg company can build storage units up to 3,000 litres for all possible types of applications. This is why production cycles have been optimized once again during recent months. With the support of Citrin technicians, the customer can now very quickly create the right individual storage units out of a modular system.

CitrinSolar GmbH
Energie- und Umwelttechnik
Böhmerwaldstraße 32
85368 Moosburg

Telefax : +49-(0)8761-3340-40
E-mail : info@citriansolar.de
Internet: www.citriansolar.de

The Moosburg company constructs and produces made-to-measure special storage units. For standard storage units with a capacity of 3,000 litres, of course, there is still considerable demand.

The intelligent large layered storage technology is adapted to the individual situation on site, as required and ordered by the customer. This means that the overall expertise and same tried and tested control technology is applied as for tailor-made solutions of 650 to 3,000 litres. The system regulator SLR ensures efficient distribution of energy and no requirement over the long term for primary energy such as oil or gas heating.

High-quality materials, including the optional excellent heat insulation for large storage units, are also a given for specially commissioned size dimensions. CitrinSolar provides a five-year warranty period for all its large storage units.

More information about this topic can be obtained from CITRIN in 85368 Moosburg. =CITRIN/BfC=
