Wolf-Garten – Snow shovels

Clearing snow is fun

Light, robust and low-temperature-impact-resistant

Because of their ergonomic operating angles, the new WOLF-Garten snow shovels provide excellent clearing results. The sturdy yet light devices are low-temperature-impact-resistant down to -40°C.

WOLF-Garten offers the perfect trio in the battle against snow. The operating angle is maintained in all three shovels, which are equipped with an aluminium handle and D-grip, however also all other multi-star® handles from WOLF-Garten also fit the range. They are resistant to gritting salt and have a high-strength aluminium profile edge. The shovels' extra high edges ensure the snow does not fall down off the sides when carried. The plastic snow shovels, which are 42 and 55 centimetres wide respectively, are low-temperature-impact-resistant down to minus 30 degrees. The 55cm version has two flat plates on the edges to allow the shovel to be forced deep into piles of snow.

The premium solution is the 45cm aluminium snow shovel, which is completely made of the light material. It is low-temperature-impact-resistant down to -40°C.

The three snow shovels are now available in many DIY stores and specialized trade outlets for 24.99, 29.99 and 39.99 euros.
