WOLF-Garten – SDL 2100

Quiet Shredder with Power

Knife Roller copes with Branches up to 35 Millimetres

The new shredder generation by WOLF-Garten works with knife rollers. With 92 dB(A), the device is far quieter than some other universal shredders. With a powerful 2100 watt engine capacity, branches up to 35 millimetres in diameter are no problem for this new machine.

Anyone wanting to get their garden in order knows how many branches fall when caring for wood. Anyone with a shredder to call their own can consider themselves lucky. Especially one, which does not noisily ring out over the land of your neighbours. With the SDL 2100, WOLF-Garten is now launching an efficient quiet shredder on the market. Thanks to the knife roller, the powerful machine is convincing with a low noise level of just 92 dB(A).

Once it has been started up, the SDL 2100 deals with branches with a diameter of up to 35 millimetres. The 2100 watt engine, which can be operated with 230 volts, is equipped with a motor overload switch and zero voltage switch. The roller works just as well backwards as it does forwards. A restart fuse is also one of the features.

The vibration-free automatic feed when branches are placed in the easily accessible opening is particularly pleasant when working. The cut branches land reliably in the sack, which comes with the machine.

Press Release

The chassis is made of steel and plastic. The characteristic WOLF-Garten red and black contrast elegantly. The yellow wheel covers add a chic touch of colour.

The machine can be easily and safely set up in the garden. The stable chassis with the its equally stable handle follows virtually every manoeuvre reliably, be it up and down, over sticks or over stones.

The SDL 2100 is brilliantly suited for the somewhat smaller plot. From spring 2011, it is available for around € 249.00 in DIY stores and garden retailers.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.
