World Premiere from WOLF-Garten

Mow More with Fewer Watts

BluePower Technology only uses half as much power

Once again, WOLF-Garten revolutionises lawn mowing. Despite only using half as much electricity, the BluePower aggregates achieve the same or a higher level of performance as previous machines.

All keen gardeners will need to change their habits. Whereas they previously needed 1600 Watt per hour to cut 1000 square metres of grass, now 800 Watt is enough! The motor output with the highest number of Watts is no longer always the best lawnmower, since now it matters what the mower can do. The electronically controlled permanent magnet engine achieves a high degree of effectiveness for a low input.

In addition, there is a quiet, low vibration and pleasant motor sound. Because the engine runs gently, the engine speed is regulated electronically and naturally it has overload protection.

The optimized cutting system also contributes to the energy reduction. What is more, with excellent cutting performance the collecting results are very good.

The three BluePower models are called 34 E, 37 E and 40 E, corresponding to their cutting width.

The plastic chassis is attractively designed; large wheels at the back and small wheels at the front offer excellent driving comfort. The

Press Release

cutting height setting works centrally and has five levels. The grass bag is generously sized with a capacity of 35 litres and even 55 litres on the 40 E, naturally with a level indicator. Big performance with low energy consumption – WOLF-Garten has started the lawn mowing revolution.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.

MTD, the "Modern Tool and Die Company", with its headquarters in Cleveland, Ohio is the world's largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Europe and Canada.

MTD offers every gardener – whether professional or hobby gardener – a product range from five brands on the European market; MTD, GUTBROD, YardMan, Cub Cadet and also WOLF-Garten, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum if motorised garden tools; from electric lawnmowers to motor hoes and snow blowers all the way up to miniature tractors.
