

## Press Release

### Cub Cadet – Tank S 60 D

## The Big One for Rough Terrain

### Extremely Manoeuvrable Zero-Turn Mower

It is called how it looks: Tank. Nevertheless, the large zero-turn mower by CubCadet is surprising. Powered by an efficient 3-cylinder Yanmar engine, the new TANK S 60 D runs cleanly, quietly and efficiently. The direct injection engine provides continuous power, no matter what work is being carried out. However, above all: It is child's play to operate using a completely normal steering wheel.

As a result, skilled exercises with two handles, as is normally the case with zero-turn mowers, are now a thing of the past. The Tank S 60 D can even manoeuvre outstandingly sideways on a slope. The standard servo support has an effort-saving effect.

The capacities of the Tank satisfy even the highest demands. If you combine all this with first-class reliability, durability and economical fuel consumption, then you've got a piece of machinery which fulfils hard working requirements – day after day.

Whether a large field or embankment, lawn with lots of borders or parks with trees – the Cub Cadet Tank S 60 D is prepared for the highest demands and professional use. An efficient 3-cylinder Yanmar engine drives the zero-turn mower. The power of the direct injection engine is continually available, irrespective of what work is on the agenda at the moment. The powerful diesel engine runs cleanly, quietly and efficiently – with enormous capacities.

## Press Release

The Tank S 60 D permits a real zero-turn thanks to the easy-to-operate all-wheel steering. In addition, tight manoeuvres around obstacles of any kind are possible. Even on hills or in places where you would normally have to use a hand mower, the new premium Cub Cadet is the machine of choice. It manages the tightest curves around trees, bushes and paths, ensuring the lawn is not damaged as a result. The fully oscillating six-point suspension makes sure of this.

The Select Cut System mower with a gigantic 152 centimetre working width is hydraulically adjusted using a handle on the dashboard. The Fastattach Deck with sensing rollers is coupled with the electric mower activation. In six-millimetre steps, height adjustments of 25 to 127 millimetres are possible. The three Highlift blades have an extended cutting edge. This guarantees exacting results for every lawn and subsurface. The blade spindles can be lubricated. The innovative, bevelled spoilers contribute well to the excellent working possibilities. The SmartJet mower cleaning system keeps the machine clean, quickly and easily.

Reliability, economic fuel consumption and durability characterise the Tank S 60 D, which has a maximum forwards speed of 16 kilometres an hour and eight kilometres an hour backwards. The comfortable, sprung seat is even equipped with an armrest for longer periods of use. The rotor disks are equipped with ball bearings and make it possible to glide softly over the lawn. An operating hour meter and a double tank with two times 26.5 litres in capacity are among the standard features. The mulch kit is available as an accessory. In addition, a 12-volt socket, spreader and snow remover blade are attached. The Tank S 60 D – a real professional machine by Cub Cadet.

MTD, the "Modern Tool and Die Company", with its headquarters in Cleveland, Ohio is the world's largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Europe and Canada.

MTD offers every gardener – whether professional or hobby gardener – a product range from five brands on the European market; MTD, GUTBROD, Yard-man, Cub Cadet and also WOLF-Garten, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum of motorised garden tools; from electric lawnmowers to motor hoes and snow blowers all the way up to miniature tractors.
