WOLF-Garten – “Turbo” Re-Seed

For rapid repairs

Little damaged spots in the lawn? No problem!

So that the dream of every gardener to have a dense, lush dream lawn rapidly becomes reality again, there is now the Rapid Repair System “2 in 1” by WOLF-Garten. This is made up of the “Turbo” Re-Seed plus special lawn soil and is ideally suited to rapid repairs of small damaged spots in the lawn.

There a flower pot has been stored too long, here the children's tent was set up for a few days and back there a couple of bushes have been rearranged. As soon as brown flecks can be seen in the lawn, this disturbs the entire image of the lush green. This means it is necessary to restore the lawn quickly, so that the lawn grows dense again soon and can display its green glory.

With its Rapid Repair System “2 in 1”, WOLF-Garten has developed and launched an ideal set for the rapid repair of small damaged spots. The “Turbo” Re-Seed – 200 grams of seeds - comes together with 3 litres of high-quality special lawn soil for about 10 m². The seed mix is extremely resilient and dense.

The fine grain size is ideal for optimal turnout on damaged spots as there is no unnecessary clumping when spreading the seed. The finely ground volcanic rock which is used offers a natural water reserve. In addition, the special lawn soil protects the seed from becoming birdseed.

Press Release

The “Turbo” Re-Seed is part of the WOLF-Garten BioActive range. The seed contains a unique combination of natural active plant strengtheners. It increases the growth and formation of root mass. The resistance of the lawn against dryness, heat and cold is increased, the defensive forces against pests and fungal disease is reinforced. In addition, the vitality, resilience and lawn quality are increased. The “Pseudomonas Proradix” bacterium is responsible for this, as it forms a “protective space” around the plant roots, activates the plant’s own defence systems and optimises the absorption of nutrients – everything for the repaired dream lawn.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.
