

## Press Release

### WOLF-Garten BluePower–Tractors

### Clean power pack for the lawn

#### Up to 32 per cent below the EU Emission Standard

With regard to tractors WOLF-Garten has consistently pursued sustainability. A great step into the future has been taken with the use of BluePower technology for their high-powered lawn tractors. The result will convince you: top performance with first-class energy efficiency in combination with outstanding exhaust gas levels. Also, the lawn tractors are 100 per cent recyclable.

The BluePower lawn tractors from WOLF-Garten are equipped with state-of-the-art Briggs & Stratton 2-cylinder engines. The particularly efficient fuel combustion is obtained by the optimal compression chamber of the OHV technology used. This makes the engine run extremely evenly and softly.

This technology ensures a considerably reduced exhaust emission of up to 32 per cent below the current EU Emission Standard. The evaporative emission has been reduced by up to 51 per cent. This protects the environment and your wallet, as the tank stays full longer. Because far fewer volatile gases are emitted by the fuel, there is less strain on the engine. The petrol retains the required quality even after longish periods of disuse.

The BluePower Monitor provides reliable information on all service intervals. The system stores the working hours and can thus calculate the important servicing deadlines. The observance of the intervals

## Press Release

guarantees that the engine maintains high eco standards for years at a time.

The vehicle has a smart newly developed yellow bonnet air inlet. In general the heavy-duty lawn mowers with saddle have striking modern design features. The high seatback ensures greater comfort. The red front bumper and black radiator grille give the tractors their characteristic appearance.

The steering wheel is available in soft black, which together with the red spokes and red hub cap make a slick ensemble.

The multi-layer petrol tank has a charcoal filter and a special tank lid. In anticipation of important future developments LED technology has been promptly applied to the headlights. The soft black reflector foil adds a touch of luxury, and, above all, the new lamps consume less energy. BluePower is available with cutting widths of 92, 96, 105 and 107 centimetres, all driven by Hydrostatic Drive.

Further information about on this subject can be obtained from WOLF-Garten, c/o MTD Products AG in 66129 Saarbrücken.
