WOLF-Garten – The BluePower Revolution

Petrol-driven mowers with fewer emissions

Innovative and sustainable in the face of the future

With the market launch of its BluePower product line the WOLF-Garten brand has once again set a new standard. Whether it is a question of the manufacture, utilisation or recycling of BluePower products, they always conform to the same principle: technology must serve nature. This goes for hand-guided petrol-driven mowers as well.

The Briggs & Stratton BluePower engine used in the petrol-driven mowers have optimised levels of fuel consumption, resulting in a reduction of emissions by up to 38 per cent in the case of exhaust gas and even as much as 51 per cent in the case of evaporative emissions. The trade mark of this innovative drive generation is the blue starting lever. The BluePower monitor accurately displays the current maintenance data, thus ensuring that the reduction of exhaust gases is permanently guaranteed. The large rear wheels and small front wheels proceed at variable speeds, as required, across the lawn.

A particular feature is the PowerPlantProtection system. The protective strip round the steel deck prevents damage to the bark of trees or shrubs. A small but subtle detail facilitates the work enormously: the centralised height setting. The cloth collection bag has a hard top and a level indicator. The seven BluePower mowers have cutting widths of 40, 48 and 53 centimetres to meet the needs of the most exacting cultivator.

MTD, the "Modern Tool and Die Company", with its headquarters in Cleveland, Ohio is the world's largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Europe and Canada.

MTD offers every gardener – whether professional or hobby gardener – a product range from five brands on the European market; MTD, GUTBROD, YardMan, Cub Cadet and also WOLF-Garten, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum if motorised garden tools; from electric lawnmowers to motor hoes and snow blowers all the way up to miniature tractors.
