WOLF-Garten – Summer and Autumn

Lush Green Throughout Winter

First Liquid Lawn Fertiliser for Use until October

The most important time of the year to apply lawn fertiliser is late summer or autumn. The new liquid lawn fertiliser “VITAL Summer & Autumn” is another genuine innovation from the experts at WOLF-Garten.

Applying fertiliser with the garden hose is a revolution in lawn culture. “VITAL Summer & Autumn” from WOLF-Garten is a brand-new product for the most important time of the year to add fertiliser – just before the onset of winter. The product is user-friendly and easy to apply. First, connect the garden hose, turn on the tap and set to “On” – and ready to go! The fertiliser can be used until mid-October.

The lawn benefits from a special nutrient boost with potassium – the “Vitamin C for vegetation”. This strengthens cell walls and, in combination with nitrogen, makes plants more resilient to stress conditions such as cold, heat, aridity or fungal infections (e.g. snow mould or red thread lawn disease). The lawn survives winter in a luscious green and healthy state. In spring, re-growth is quicker because the roots have stored sufficient nutrients.

The easy application is impressive. The fertiliser comes in a dispenser that can be directly connected to the garden hose, thus giving even dosage by automatically dispensing with the jet-spray. Over-dosing can practically be ruled out.

Press Release

Additionally, there is no need for other accessories such as fertiliser spreaders. The rapid and safe way to apply the product is also appealing – 100 square metres of lawn can be covered in just three minutes. No dust or grit lands on terraces or garden paths, as is the case for granular lawn feed.

And the plants also gain, as the substances, which contain seven per cent potassium and eight per cent nitrogen, are readily available for the plant to absorb via leaf blades and roots. This is also a safer method, ensuring that neither children nor animals collect granular feed. The spray bottles are also sustainable and recyclable dispensers designed for re-filling.

“VITAL Summer & Autumn” liquid lawn fertiliser is available in garden centres and DIY stores for 19.99 Euros.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.
