

## Press Release

### WOLF-Garten – Shovels, spades and forks

#### Tilling the soil made easy

#### Ergonomically-shaped tools for the garden

The tools of the “Ergo” series from WOLF-Garten open up a new dimension of digging and tilling. Whether it’s spades, shovels or forks – all three come with ergonomically-shaped shaft and “D” handle perfectly suitable for dual-handed use, even for large areas.

The area stretches out in front of the gardener; the earth has to be turned-over one final time before planting the potatoes or vegetables. Gone are the days when the T-handle makes the work difficult, the thin blade of the shovel presses into the sole of the foot. Because the “Ergo” range from WOLF-Garten brings with it new back-saving devices to the trade.

The “Ergo“-spades has a 1.15 metre long curved stainless steel shaft. It has a “D” handle at the end of the shaft, which is big enough for dual-handed use with effective power application. The gripping zone is ergonomically-formed and has an anti-slip plastic coating for the best and most comfortable use. This allows even larger patches and beds to be turned-over, and made ready for the sowing of the seeds. One special detail is the footplates on top of the blade; this lowers the risk of injury, but also ensures more power is transferred.

The perfect alternative for the larger model is the “Ergo” ladies’ spade. It has a 1.09 metre long shaft, which is perfectly suited for levering out and moving plants. It is possible to work well with it on smaller, more restricted areas.

## Press Release

A wise addition is the "Ergo" fork with the 1.15 metre long shaft described above. Plants can be moved, compost heaps can be aerated and clods of earth can be broken, preparing the soil for sowing. The fourth member of the range of digging tools is the "Ergo"-shovel, which is equipped with the same shaft and handle. The gardener can tackle large areas with them, allowing him to prepare the ground for flowers, seeds or vegetables.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.
