WOLF-Garten – Blue Power electro-trimmer

Saving energy with power

Economy mode at the press of a button

WOLF-Garten is bringing a new powerful electro lawn trimmer onto the market. The Blue Power GT 850 convinces with a range of innovative features, especially the “BluePower” button for problem-free switching to economy mode with high performance.

A freshly mown lawn is the gardener’s best advert. But peril lies in the more intricate areas, an elegantly rounded flowerbed or around the trees. This is where the lawn trimmer comes into its own, useful devices, if they are intelligently made.

The BluePower GT850 from WOLF-Garten is the flagship of the trimmer family. With a power rating of 500 Watt and dual-cord technology, it is a powerful helper, which gets into every nook and cranny thanks to its handle, which can be adjusted into 4 positions. The “BluePower” button is innovative. Simply press it and the device functions on half the energy, even more quietly and lower vibration levels.

Nonetheless, the cords effectively cut through the greenery. Another new feature is the fully-automatic cord feed, which makes annoying hitting on the ground obsolete. The specially conceived reel GT-F 10 is equipped with two lots of 5 m long durable material.

Weighing in at only 2.3 kg, the GT 850 is light and easy to handle. The adjustable second handle and the telescopic part allow an ergonomically correct, non-tiring holding of the tool. This leads to a noticeable relief of the strain.

Press Release

The Softgrip zone ensures a secure grip.

The so-called edge function transforms the lawn trimmer into the perfect lawn edge trimmer – it is simply tilted at an angle of 90 degrees. The height adjuster during trimming is smart, which is how the cutting height is set to precision. The running-gear is equipped with a height-adjusting function.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.
