New: WOLF-Garten “Power Base”

Powerful 36-Volt garden trio

A battery pack with motor for three garden tools

A motor with a 36-Volt battery is the “Power Base” of the WOLF-Garten Expert range, which as a powerful energy source effectively drives three very different garden tools: hedge shears, leaf blower and grass trimmer. And, thanks to the quick charger, the battery is fully re-charged after only one and a half hours.

WOLF-Garten is taking a step forward with the “Power Base” from the “Expert” range. No annoying power cables lying in the way, no loud droning petrol motor emitting exhaust fumes. Instead, electrically-powered tools with strong batteries and long running times are in use. One single source of energy effectively runs different applications. It is a whole range of garden tools, which can be linked up to the battery pack with a high-performance 36-Volt motor. The power base Li-Ion Power PBA 3600 only weighs 2.5 kg. Naturally, this already includes the lithium ion battery, which provides 36 Volt and 2.0 ampere hours. The quick charger only requires one and a half hours for a full charge. The device is completely ergonomically shaped, especially the switch, and provides Softgrip zones on the handles. The modern, almost futuristic and light design makes the “Power Base” into a real head turner. In addition, it is really easy to handle.

The WOLF-Garten “Expert” lawn trimmer Li-ion power GTA 3600 also belongs to the innovative concept. With a cutting diameter of 33 cm, thanks to the dual-cord technology, it is one of the larger battery-powered trimmers. The robust aluminium shaft can be separated. In the edge function, the head is tilted at an angle of 90 degrees and the

Press Release

trimmer becomes a perfect edge cutter. The tool demonstrates the highest level of effectiveness with a weight of only two kilos.

The Li-Ion Power HTA 3600 hedge shears from the same range has a cutting length of 45 cm and weighs only 1.5 kilogrammes - The dual-sided diamond sharpened, rotatable double blades are fitted at an interval of 16 mm, it goes without saying that rapid blade arrest is possible.

The third member of the group is the Li-Ion Power BA 3600 blower. It can blow 10 cubic metres per minute. Whilst doing this, the 1.5 kilo lightweight accelerates the air up to a speed of 240 kilometres per hour.

By the way: Each of the devices can work for about 15-20 minutes from a single charge, when using more than one battery, longer applications are possible. Even the Li-Ion Power CA 3600 charger is not heavy; it only weighs 200 grammes but provides the necessary energy in the right place.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.
