WOLF-Garten transforms simple into high quality

Hedge shears simple and light

HS 50 E convinces across the board

Simple in their construction, yet high in quality; the new HS 50 E hedge shears from WOLF-Garten. Equipped with a 500 Watt motor, the can knock any hedge into shape.

Whether it is conifers or hornbeam, thuya or laurel – every hedge requires a good cutting to stay in shape. The gardener must carry out the task at least once a year. Either that or it will literally leave him in the shade. Being able to use good material instead of having to cut it laboriously by hand it a pleasure. WOLF-Garten has a well-engineered starter model in its successful HSE range in the shape of the HS 50E hedge shears.

The cutting length is an ample 50 centimetres. The rows of blades are positioned at intervals of 20 millimetres from each other. Whatever doesn't fit into the shape is cut cleanly. The 500 Watt electric motor drives powerfully, turning the work into fun. Weighing a mere three kilogrammes, it is possible to cut for longer as the operator's strength is preserved.

The row of blades stops less than half a second after the start/stop switch has been released. This reduces the risk of injury substantially. The ergonomically formed handles allow secure hold and reduce the physical strain. The dual-handed switch prevents unintentional starting. The laser-cut and dual-sided diamond-sharpened blades with impact resistance are special features, which enhance the quality of the tool. This makes trimming the hedge fun again.
