

## Press Release

**Bullhorn is the distinguishing feature**

### **New MTD petrol trimmers with power**

**For when you need to cut more than grass**

**MTD has launched two new petrol trimmers at the same time. The durable two-stroke engines provide the tools with 1.05 and 1.2 kW respectively to fulfil their tasks. All of the models in the new series are equipped with bullhorn.**

Thick undergrowth, an apparently unconquerable field of nettles – quite exciting challenges for garden tools. The lawn trimmer is out of its depth, this is a job for petrol trimmers. For this reason, MTD is introducing a new small family of effective helpers onto the market.

The durable two-stroke motors are available with cylinder capacities of 33 and 43 cubic centimetres, which produce 1.05 to 1.2 kW at 8.000 revolutions per minute. The “Easy Starting System” makes starting child’s play. The distinguishing feature of all of the models of the models is the bullhorn, which make handling the petrol trimmer both comfortable and easy. The weight hangs on the belt over the shoulders, allowing the petrol trimmer to be controlled without any extra power required for carrying.

The trimmer head with the two-cord cutting system clears an area 42 cm wide completely and reliably. At three millimetres thick, the cord is generously dimensioned. The 3-T blade for cutting has a diameter of 25.5 cm.

## Press Release

The engine of models MTD-1033 and 1043 have been equipped with high-end components. The tools only weigh 7.4 and 7.6 kilogrammes. The solid aluminium handles contribute to this. In addition, double shoulder belts are supplied for increased comfort, safety glasses and the blade are, of course, also included.

Further information about on this subject can be obtained from MTD Products AG in 66129 Saarbrücken.
