### Duscholux – Bella Vita 3

## Spacious and Purist

### New shower enclosure series with attractive and clean design

**The new Bella Vita 3 partial framed shower enclosure series from Duscholux makes spacious room arrangements possible for individual bathroom designs. Sleek lines and high value materials promise durability for the modern bathroom.**

Bella Vita 3's purist design follows the Bella Vita Nova series. The partial framed shower enclosure series offers spacious dimensions and a variety of glass designs for versatility and individually customisable solutions. Whether fitted with sliding, swing door or pivot folding doors the variety is genuinely impressive. A combination of functionality and good design is always at the forefront.

The sliding door version offers surprisingly innovative and play-free glass guidance. Wide rollers guarantee smooth running with no expense spared on glass and profile materials. The true and sleek lines of the design are coupled with high-end finishes. All screw, attachments and covers are sunken into the profile and are invisible.

The "Push & Clean" function promises easy cleaning: with a gentle push, the door simply detaches from outside for easy care – no need for awkward bending to remove the panel.

All connecting elements are extremely stable thanks to high quality, durable materials. Slim sealing profiles made from aluminium introduce charm and elegance to the bathroom.

The swing and pivot folding doors have a lift and lower mechanism ensuring frictionless opening and closing. Both versions are supplied with elegant bow-shaped handles from the new Duscholux Design series.

The principle of "mount, install and then secure" increases flexibility for installers. The groups of components are delivered fully pre-assembled and installation is easy and fast, not least thanks to fewer individual components. Glass parts can be easily repositioned in rollers with integrated eccentric or also height-adjusted. Door parts are only fitted after mounting the frame and are easy to disassemble without tools. Doors are also easily realigned. Neat solutions are available for special units with shortened side panels or recess units. Here, a proven feature is precise and simple integration of the magnetic strip. Bella Vita 3 – purist design for the modern bathroom.
