Duscholux – Step-in Pure

Free Choice: Showering or Bathing?

Simple operation – a single manoeuvre

Step-in Pure from Duscholux is the ideal combination of shower and bathtub. The rectangular tub is easy to walk into thanks to the wide opening. The tub - available as version left or right - can only be filled when the door panel is inserted.

Anyone who loves comfort and relaxation while bathing or showering will be delighted with Step-in Pure from Duscholux. This offers a shower solution and bathtub combined in a single unit. The removable acrylic door insert guarantees easy entry to the shower area. Incredibly simple to operate – the door insert is fitted with a single action. The unit is connected to a drain: the bathtub cannot be filled without first slotting in the door panel.

The white and translucent appearance of the door insert is appealing and particularly attractive with a succinct handle. It is also easy to use with the generously sized lever on the rim of the bathtub.

The sealing system with two drains is uniquely simple and smart. The door insert, with a weight of only 2.5 kg, is easily secured by slight pressure – now bathing comfort can begin. The tub is left open if used as a shower. The door insert can be inserted into mounted fittings on the tub.

The bathtub dimensions are 1700 x 750 x 450 millimetres and water capacity of 190 litres. An elegant feature is also the modern drain

cover in the colour of the bathtub. The drain with cover is centrally positioned, thus ensuring no interruptions to bathing comfort. Bathing enjoyment is also enhanced by the ergonomically shaped backrest. The standing area offers plenty of space for showering.

The Duscholux bathtub is available as left and right version. The perfect Step-in Pure shower enclosure can be fitted with a one-part or two-part folding wall. However, other Duscholux shower enclosures are also suitable.

Acrylic is a pleasantly warm and smooth material and makes the bathtub, supplied fully pre-assembled, especially easy to clean. The bathtub panelling, optionally available as a front, corner or U-shaped unit, can also be supplied in different designs if no tiled area is to be finished around the bathtub. All that remains is to connect to the water supply and it's time to enjoy bathing and showering! The Step-in Pure can also be installed as a sunken bathtub making entering it almost barrier-free.
