### WOLF-Garten ROBO SCOOTER® 400 and 600

#### Perfect cut and perfect timing

#### Lean back and relax!

The Ambition Robo Scooter from WOLF-Garten is available in two new models with a brand-new dynamic design. The new robot lawnmowers are genuine all-rounders and can automatically process an area measuring 400 m<sup>2</sup> to 600 m<sup>2</sup>. Mowing, mulching and even trimming jobs now take care of themselves.

The WOLF-Garten Robo Scooters 400 and 600 can be intuitively operated via the LC display. This saves time during initial operation. The boundary wire, which is easy to lay out, sets the limits of the mowing area.

With Robo Scooter there is no need for time-consuming trimming of lawn edges. In the edge-trimming mode the borders are cut so precisely that you can save manual and time-consuming tidying work, for instance, along walls or by trees. That's achieved by the overhanging cutting deck.

Thanks to the extensive cutting width and the latest battery technology, the Robo Scooter 400 and 600 achieve reduced mowing times. Your lawn space is quickly free and you can enjoy it again straight away.

The Robo Scooter blades have two advantages. They are sturdy steel blades with a comparatively long lifespan of up to a whole season.

## Presseinformation

In combination with the cutting height adjustment, it is no trouble to cut even longer grass, for instance, after returning from holiday or at the start of the season.

To ensure children's safety and prevent use by unauthorised persons, the Robo Scooters from WOLF-Garten are fitted with an electronic key lock. The blades instantly stop if they are lifted or tilted. If they hit an obstacle, the blades and the mower are stopped. The mowing process then re-starts in a different direction.

If the batteries are getting low, the Robo Scooters return independently back to the base station. They seek out the shortest route to the boundary wire and follow this route on their return. In this case they always choose a different track to avoid untidy edges appearing on the lawn surface.

The boundary wire is easy to lay and gives every WOLF-Garten Robo Scooter 400 and 600 its working radius. If it collides somewhere on your lawn, it simply changes direction. Does your lawn have slopes and steep areas? It masters these brilliantly! These independent garden helpers are protected from unduly harsh impact with fixed objects, incorrect use, prolonged periods of rain or theft thanks to several sensors and an alarm system.

The Ambition Robo Scooter from WOLF-Garten is available for € 1399,00 in many garden centres and DIY centres.

More information about this topic is available from WOLF-Garten, c/o MTD Products AG, 66192 Saarbrücken.

## Presseinformation

MTD, the "Modern Tool and Die Company", with its headquarters in Cleveland, Ohio is the world's largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Europe and Canada.

MTD offers every gardener – whether professional or hobby gardener – a product range from five brands on the European market; MTD, GUTBROD, YardMan, Cub Cadet and also WOLF-Garten, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum if motorised garden tools; from electric lawnmowers to motor hoes and snow blowers all the way up to miniature tractors.
