Cub Cadet tractors:

Safety mowing while driving backwards

Reverse mowing technology

With numerous orientation solutions and technologies, Cub Cadet has repeatedly set new standards for tractor mowing safety. With the RevTEK technology the brand gets another step ahead.

The reverse mowing technology (RevTEK) enables users of a Cub Cadet tractor mower to leave the mowing deck switched on even when driving backwards, provided there are no children or animals nearby. That boosts safety.

If the user starts the tractor in the normal mode, the motor is automatically switched off when the motor is put into the reverse gear. If the driver is convinced there is no danger behind, the special reverse push button can be pressed and the ignition key turned to reverse mode.

This enables the reverse mowing gear for this drive cycle. After switching off the motor, the reverse mowing function must be re-activated when starting up again.

Cub Cadet fits all tractor mowers in the 700 and 1000 series with the RevTEK technology. Cub Cadet tractors are exclusively available from specialist traders.

More information about this topic is available from Cub Cadet, c/o MTD Products AG, 66192 Saarbrücken.

MTD, the "Modern Tool and Die Company", with its headquarters in Cleveland, Ohio is the world's largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Europe and Canada.

MTD offers every gardener – whether professional or hobby gardener – a product range from five brands on the European market; MTD, GUTBROD, YardMan, Cub Cadet and also Cub Cadet, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum if motorised garden tools; from electric lawnmowers to motor hoes and snow blowersall the way up to miniature tractors.
