MTD Electric Mowers

The Light-Weights for Small Lawns

Compact, Powerful and Maintenance free

The new electric lawnmowers from MTD are ideal for small areas. Despite their powerful universal engines, they are emission-free and environmentally friendly. They are impressive due to their low maintenance requirements and ease of handling.

The world is full of small gardens. Areas of 250 to 350 square metres are the norm, not the exception. Electric lawnmowers are the best solution for plots of this size. They are equipped with light but powerful universal engines, which drive the mower – with 1,000 or 1,400 watts.

The SMART 32 E works its way through the grass with a 32 centimetre cutting width, while the SMART 38 E has a 38 centimetre width. The grass cuttings are extracted and collected, in the 27 or 40 litre plastic box.

The electrical drive is emission-free and environmentally friendly; no fossil fuels are used.

The low weight and low maintenance requirements with an impressive performance are among the particular advantages of the MTD electric lawnmowers. They are compact and easy to handle, simply ideal for small lawns.

MTD, the "Modern Tool and Die Company", with its headquarters in Cleveland, Ohio is one of the world's largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Mexico, Asia and Europe.

MTD offers every gardener – whether professional or hobby gardener – a product range from three brands on the European market; Cub Cadet, WOLF-Garten and also MTD, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum of seeds, fertilizers, hand garden tools and motorised garden tools; from electric lawnmowers to motor hoes and snow blowers all the way up to ride-on mowers and lawn tractors.
