MTD Log Splitters

25 Tonnes through every Log

Impressive Hydraulics ensure Permanent Pressure

More and more people are using firewood. This helps to use sustainable energy sources. MTD now has a log splitter in its range, which has 25 tonnes of power to cut through logs of up to 63.5 centimetres.

For centuries, people have cut up their fuel wood with an axe and woodsplitting hammer. Later, farmers used cleavers with their tractors. Since increasing numbers of people are installing wood burners and cutting their own firewood, log splitters have become sought-after for private use.

MTD has developed a high-performance machine in the form of the LS 550. The powerful Briggs & Stratton engine with an output of 2.6 kW cuts through logs with a length of up to 63.5 centimetres with its 25 tonne cutting force. The cast-iron base plate creates enormous stability.

A major hydraulic tank ensures reliable and permanent pressure. Of course, the splitting wedge can be replaced.

Two-handed operation is easy and safe. You can work vertically and horizontally with this stable construction.

MTD, the "Modern Tool and Die Company", with its headquarters in Cleveland, Ohio is one of the world's largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Mexico, Asia and Europe.

MTD offers every gardener – whether professional or hobby gardener – a product range from three brands on the European market; Cub Cadet, WOLF-Garten and also MTD, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum of seeds, fertilizers, hand garden tools and motorised garden tools; from electric lawnmowers to motor hoes and snow blowers all the way up to ride-on mowers and lawn tractors.
