MTD-OPTIMA Mower

Flexibly and Powerfully through the Grass

Petrol Lawnmowers with the latest Generation of Engines

The successful OPTIMA series from MTD is being expanded by three new models. The petrol lawnmowers are equipped with the latest generation of engines. All devices are equipped with a wheel drive and are impressive with their ease of handling.

The new MTD petrol lawnmowers are very impressive as a result. They build on the OPTIMA series for small to medium-sized lawns by three absolute top performers. They are equipped with the latest generation of engines, which also drive the wheels. The output ranges from 2.0 to 2.8 kW, ideal for areas of 1,000 to 1,500 square metres.

The sheet steel housings come as standard, ensuring a long life. The fully folding handles mean the mowers can be transported compactly. They also need less storage space in the shed or garage. But comfort is the name of the game when it comes to working.

The central cutting height setting ranges from 2.8 to 9.2 centimetres. The new models have high rear wheels, which provide their outstanding manoeuvrability.

MTD, the "Modern Tool and Die Company", with its headquarters in Cleveland, Ohio is one of the world's largest manufacturer of motorised gardening tools. MTD Products Inc. was founded in 1932 and is still family owned. MTD has manufacturing capacities in the USA, Mexico, Asia and Europe.

MTD offers every gardener – whether professional or hobby gardener – a product range from three brands on the European market; Cub Cadet, WOLF-Garten and also MTD, which covers nearly every application in the garden. Every brand makes its mark through individuality and unmistakable optic. All of the brands compliment a wide spectrum of seeds, fertilizers, hand garden tools and motorised garden tools; from electric lawnmowers to motor hoes and snow blowers all the way up to ride-on mowers and lawn tractors.
