Cub Cadet Tractors

Pioneering Steering Technology

The new Z-Force SZ 48 impresses with 15 Cutting Levels

The new Z-Force SZ 48 is perfect for park-sized gardens, and is equipped with patented steering technology. Certain parts are eCoat treated for particular longevity.

You have more than 4,000 square metres of lawn to mow? then the new Z-Force SZ-48 is the right choice. With its 726 cc Kawasaki engine with 22 HP it is perfect for large areas. The lawn tractor is developed for professional use. The spring-mounted seat with high backrest and armrests ensures a comfortable and safe seat, even during long periods of use. The heightened seat position allows a good overview. The steering column is height-adjustable and there is a massive amount of legroom.

The dual hydrostatic transmission is very powerful and the fast speed system saves time. The Synchro Steer technology is pioneering. The two drive levers – as is normal for zero-turning circle lawnmowers – are replaced by a steering wheel. The two front wheels are steered by a special lever system, which also controls the rear wheels. Depending on the steering wheel position, the rotational speed of the inside wheel is adjusted precisely, avoiding any wheelspin.

Press Release

When the steering is locked fully, the inside rear wheel then rotates backwards and the ride-on mower turns on the spot (zero-turn).

Selected parts, such as the reinforced cutting deck, frames and front axle are treated with the eCoat procedure before they are powder coated. They are passed through a bath of liquid charged with protons. The parts themselves are negatively charged, meaning an anti-corrosion layer is applied.

The major advantage of this procedure is in the complete application of the protective coating, even on hard-to-reach places and difficult parts such as the welded seams, corners, cavities and others. This ensures a particularly long life and prevents corrosion. The Z-Force SZ 48 costs between 5,699.00 and 6,799.00 Euro.

More information about Cub Cadet is available from MTD Products AG, 66129 Saarbrücken.
