

## Press Release

### Cub Cadet Tank SZ-60

## Agile Giant

### Lawn Tractor with 152 Centimetre cutting width

**The new Tank SZ-60 is impressive with its fascinating steering technology and special corrosion protection provided by a special galvanising procedure. It is developed for professional use on large lawns.**

Cub Cadet has developed a giant on the hillside with the new Tank SZ-60. The powerful Kawasaki engine provides a good 27 HP with its 852 cubic centimetres, which is transmitted to the wheels through a hydraulic drive. The 152 centimetre cutting deck is good for lawns of more than 6,000 square metres. The grass can be cut to heights ranging from 2.6 to 12.7 centimetres, in 17 steps.

The steering technology is pioneering. Instead of two drive levers – as is usual with zero-turning circle lawnmowers, the driver uses a steering wheel, which turns particularly easily due to the electric power steering. This controls both the front wheels. The drive on the rear wheels is also controlled at the same time using a sophisticated linkage - the Syncro Steer technology. Depending on the steering wheel position, the rotational speed of the inside wheel is adjusted precisely, avoiding any wheelspin. When the steering is locked fully, the inside rear wheel rotates backwards and the Tank SZ turns on the spot (zero-turn). The fast speed drive system also saves time.

# Cub Cadet®

## Press Release

The spring-mounted Cub Cadet seat with high backrest and armrests, generous legroom and height-adjustable steering column provides the driver with comfort for professional use, even over a long period of time. A mulch kit can also be used.

Selected parts, such as the cutting deck, the reinforced frames and front axle are galvanised with the eCoat procedure before they are powder coated. They are passed through a bath of liquid charged with protons. The parts themselves are negatively charged, meaning an anti-corrosion layer is applied.

The major advantage of this procedure is in the complete application of the protective coating, even on hard-to-reach places and difficult parts such as the welded seams, corners, cavities and others. This effectively prevents corrosion. The new Tank SZ-60 is available for between 7,999.00 and 9,299.00 Euro.

More information about Cub Cadet is available from MTD Products AG, 66129 Saarbrücken.
