

## Press-Information

**Up to 600 m<sup>2</sup> with one battery charge**

### **Powerful 40V battery-powered lawn mower**

**With 2-in-1 mulching or catching function**

**The new Greenworks G-Max 40V lawn mower can mow up to 600 square metres of lawn without noise or exhaust fumes. The latest generation of battery-powered mowers is just right for the environmentally minded gardener. And once the battery is empty, it can be recharged in about an hour.**

The Greenworks G-Max 40V lawn mower is available with a cutting width of 41 cm. It is equipped with the flexible 2-in-1 function. This means that mowing and collecting or mowing and mulching is possible with the same machine.

A 41 cm steel shearing blade driven by a high-performance motor is built into the robust composite mowing deck. Depending on the battery size (2Ah or 4Ah), the mower can mow up to 600 m<sup>2</sup> of lawn with one charge. They are fully recharged in just 60 or 120 minutes.

The cutting height for the 41 cm mower can be adjusted in six steps from 20-70 cm with a single push of a button. The grass catcher has a capacity of 50 litres.

The Greenworks mower weighs 18.5 kg without battery. Thanks to a carrying handle, the mower can be moved effortlessly. The ergonomic handle bar can be folded conveniently in just two steps without tools for space-saving storage.

#### **About mulching**

Mulch keeps the lawn fit. No wonder, since it protects the soil and supports the biological balance. To mulch properly, you need the

## Press-Information

right tools. Mowing, catching, mulching - the new Greenworks G-Max 40V has it all in one machine thanks to the 2-in-1 function. With this system you can either mow and catch or mow and mulch. The most important thing is that the garden owner decides what he wants to do in no time at all. He makes his choice by inserting a mulching kit. This closes the passage to the collecting bag, the cuttings remain in the area of the rotating blades, are chopped into small pieces and returned to the turf.

### **One battery for all Greenworks 40V units**

The Greenworks 40-volt rechargeable battery system for garden tools is as simple as it is ingenious: two rechargeable batteries for different applications and different performance classes ensure long service life and constant battery performance. The 4Ah and 2Ah batteries fit all Greenworks 40V devices. From the hedge trimmer to the garden hoe to the motorised wheelbarrow. They are particularly powerful, lightweight, environmentally friendly, safe, durable and economical.

Handling is child's play: just plug it in and get started. And that's how charging works. LEDs on the charger indicate when charging is complete. Four LEDs on the battery also indicate the remaining battery life at the touch of a button.

The batteries can be recharged at any time and without memory effect and remain permanently charged so that they are immediately ready for use even after long, proper storage.

Further information on this topic is available from Greenworks Tools, 50996 Cologne, Germany.
