82V high-performance battery from Cramer

Backpack power leaf blower

Leaves and dirt removed in no time at all

Cramer GmbH from Leer offers a top battery leaf blower in the 82V class for professional use. The backpack leaf blower with a versatile rechargeable battery backpack enables a longer running time due to two simultaneously working rechargeable batteries of 6 Ah each. This corresponds to a capacity of 864 Wh and a maximum power of 3.2 kW. If the leaf blower tube is removed, the every other Cramer 82V battery device can be operated via battery adapter and cable.

It is well known that battery technology today also outstrips other energy systems in garden and power tools. This now also applies to the battery-powered leaf blowers from Cramer, which powerfully and effortlessly remove leaves, grass clippings, sand and dirt from pavements and surfaces.

The top-of-the-range model offers a top performance that is at least as good as, if not superior to, gasoline-powered appliances. With their extremely high air throughput and powerful blower output, they clean large areas such as parking lots, sports facilities and urban areas in no time at all.

The back-packed Cramer leaf blower can be perfectly dosed by variable operating levers. Thanks to cruise control, the top machine also runs without having to press the control lever. This, together with low vibrations, is gentle on the hands and arms.

The air speed is 69 m/s, the air flow is 1,060 m³/h at the tip of the pipe

Presseinformation

and 1,300 m³ in the housing. The boost function ensures even higher power for short periods of time. And all this with a pleasant background noise.

This performance is also more than right for professional demands. The Cramer 82V high performance batteries and motors are optimally developed together and form a highly efficient functional unit.

For some components, lightweight materials such as magnesium and aluminium are used. This makes the unit lightweight in relation to performance and yet robust for everyday use. All materials are polished or textured for quick and easy cleaning. In addition, the Cramer blower is largely maintenance-free. Thus, this real lightweight easily survives even difficult long-term use.

The Cramer 82V leaf blowers are available for 399,-- € the 6 Ah battery for 299,-- € and the charger with two charging stations for 79,-- € in specialist shops. There is further information to the topic with the Cramer GmbH, 26789 empty.
