New from Cramer

There is power inside

82V battery-powered chainsaws with 1.5 kW and 2.5 kW power output

Trees can now be powerfully cut without exhaust fumes on the face. The two Cramer 82V battery-powered chainsaws deliver 1.5 kW and 2.5 kW at a torque of 1.9 Nm and 2.6 Nm, respectively, and a chain speed of 20 m/s and 24 m/s. And thus come very close to the gasoline-powered machines used in agriculture and forestry.

The Cramer 82V battery-powered chainsaws are market leaders in terms of power, torque and cutting performance and are therefore predestined for tree care work. The efficient and maintenance-free brushless motors can be optimally adjusted in performance via the variable operating lever.

The underside of the Cramer battery-powered chain saw housing is made of magnesium and is therefore extremely stable. Thanks to their lightweight construction - the weight without battery with sword and chain is 3.3 kg and 5.4 kg respectively - and the well balanced centre of gravity, they lie comfortably in the hand.

Both chainsaws are equipped with a 30/33 cm sword as standard. Optionally they are expandable to 36/46 cm swords. The chain oil tanks hold 250 ml.
