Greenworks 40V battery-powered leaf blowers and vacuum cleaners

Simply blow away or suck up leaves

Practical helper in autumnThe new Greenworks G-Max 40V

It is autumnal and the leaves have again set their most beautiful colours. This is the right time for the small Greenworks 40V battery-powered leaf blower/vacuum cleaner. Because when the leaves cover the ground after the first autumn storms, the responsible house and apartment owner must take action.

The Greenworks 40V battery-powered leaf blower/vacuum cleaner is a useful helper here. Because what should rot belongs on the compost. Where the leaves remain, there is a threat of fungal attack or next spring, for example, the grass will grow poorly and mossy. In addition, wet leaves can transform the soil into slippery surfaces.

This is where the small Greenworks 40V battery-powered leaf blower/sucker fits perfectly! Thanks to its reliable brushless motor, cruise control and variable speed control, it can even remove damp leaves immediately. The change between blower and vacuum cleaner is tool-free and fast, so that this device is functional and comfortable. And with its 45-litre collecting bag, it can remove a lot of leaves and dirt.

Tip:

Blow the leaves under the bushes and shrubs at the edge of the garden. Hedgehogs and co. will find a warm place to spend the winter. But make sure you don't keep your vacuum cleaners too close to the ground so as not to disturb the wildlife around the busy ground zone.
