

## Presseinformation

New from Cramer

### Powerful battery trimmer

#### 82V brush cutter series for difficult conditions

Cramer now offers five 82V battery-powered trimmer/brush cutter models, which make work considerably easier for the user without being bothered by the smell of petrol and loud engine noises. They are the strongest and most powerful battery-powered devices of their class on the market. At the heart of the top models 82T16 and 82TB16 is the brushless motor for maintenance-free and efficient operation. Its impressive power of 1.6 kW and torque of 1.8 Nm at a top speed of 158m/s ensure an excellent cut even under difficult conditions.

The overspeed governor optimises performance and increases battery life. Thanks to the four-step switch, the speed of the thread head can be adjusted precisely to the working conditions. The cutting width of both units is 46 cm.

Due to the stable lightweight construction with magnesium profiles, the trimmers are robust and extremely durable. The ergonomically optimised tilt angle of 30° brings efficiency and comfort to trimming. The low vibrations also contribute to this. The Cramer 82T16 trimmer weighs 4.5 kg. It is available with loop handle and Basic-Assist carrying system. The 82TB16 weighs 5.5 kg and has a bike handle and the Cramer Ergo-Assist carrying system that can be combined with numerous different Cramer 82V products.

A total of five Cramer 82V battery trimmers/cutters are available from specialist retailers.
