Greenworks 48/24V battery system for lawn trimmers

Double power for beautiful lawn edges

Power like you need it right now

With its two new 48/24V cordless lawn trimmers and the Sense with two-handed handle, Greenworks brings three efficient devices with running times of 24 to 72 minutes for a wide range of applications. With high rotation speeds of up to 8,400 rpm, the two trimmers and the scythe can reach tall grass or wild growth in any corner. They are also very easy to handle.

Thanks to the height-adjustable handles of the two trimmers, one of the handle positions always fits the hobby gardener. The two-handed bike-handle of the scythe can be rotated and adjusts to the angle of the user's arm length. Thus, all three tools allow an ergonomically correct and fatigue-free working posture. If the swivel trimmer head of the small trimmer is tilted, the tool is quickly and easily transformed from a lawn trimmer into an edge trimmer. Weighing only 1.7, 3.1 and 4.5 kilograms, the machines have a cutting diameter of 25 and 33 cm.

The devices support the horticultural efficiency, the 48/24V batteries contribute the required power. In the system there are two batteries of 4Ah and 6Ah for the trimmers and scythes, which can be used individually depending on the size of the garden. Only one charger regulates the loading after the work is done. It knows exactly which type of battery it is currently charging.

The Greenworks 48/24 system is now available in DIY stores in Germany, Austria and Switzerland.
